KATA PENGANTAR

Penerbitan ini membentangkan statistik Perdagangan Antarabangsa Malaysia (barangan) berkaitan import dan eksport di peringkat negeri dengan seluruh dunia dari tahun 2016 hingga 2021. Di samping itu, penerbitan ini juga menyediakan statistik terperinci bagi setiap negeri mengikut komoditi utama / terpilih, negara asal dan destinasi bagi tahun 2019-2021.

Statistik Perdagangan Malaysia mengikut Negeri 2022 bertujuan untuk menyediakan statistik terperinci di peringkat negeri kepada pihak *stakeholders*. Statistik komprehensif ini dihasilkan dari modul *Trade Enterprise Characteristics* (TEC), iaitu salah satu inisiatif Jabatan di bawah *Statistics Big Data Analytics* (STATSBDA). TEC mengintegrasikan dua domain statistik yang berbeza iaitu pangkalan data perdagangan barangan antarabangsa dan *Malaysia Statistical Business Register* (MSBR). Statistik ini memberikan maklumat penting kepada penggubal dasar untuk merangka perancangan strategik bagi negeri-negeri yang terlibat dalam perdagangan antarabangsa.

Ringkasan penemuan dibentangkan di bahagian pertama penerbitan ini. Bahagian kedua dibahagikan kepada enam belas seksyen, di mana setiap seksyen membentangkan statistik perdagangan terperinci untuk Malaysia dan lima belas buah negeri di Malaysia. Aspek teknikal seperti objektif statistik, skop & liputan, konsep & definisi disediakan di bahagian terakhir untuk memudahkan pengguna memahami statistik yang diterbitkan.

Jabatan Perangkaan Malaysia merakamkan setinggi-tinggi penghargaan kepada semua pihak yang telah menyumbang secara langsung atau tidak langsung dalam merealisasikan penerbitan ini. Setiap maklum balas dan cadangan ke arah penambahbaikan penerbitan ini pada masa hadapan amat dihargai.

PREFACE

This publication contains statistics of Malaysia's External Trade (merchandise) on imports and exports at the state level with the rest of the world from 2016 to 2021. In addition, this publication provides detailed statistics for each state according to major / selected commodities, country of origin and destination from 2019 to 2021.

Malaysia External Trade Statistics by State 2022 aims to provide detailed statistics at the state level to the stakeholders. These comprehensive statistics are generated from the Trade Enterprise Characteristics (TEC) module which is one of the Department's initiatives under the Statistics Big Data Analytics (STATSBDA). TEC integrates two different statistics domains: the international merchandise trade database and Malaysia Statistical Business Register (MSBR). These statistics provide imperative information to policymakers to formulate strategic planning for states involved in international trade.

Summary of findings is highlighted in the first section of this publication. The second part is divided into sixteen sections, whereby each section presents detailed trade statistics for Malaysia and fifteen states in Malaysia. Technical aspects such as the objective of the statistics, scope & coverage, concept & definitions are provided in the last section to facilitate users understanding of the statistics.

The Department of Statistics Malaysia acknowledges the cooperation of all parties that contributed to the success of this publication. Any feedback and suggestions towards improving the future publication is highly appreciated.

Pulau Pinang kekal sebagai pengeksport litar elektronik bersepadu terbesar dengan sumbangan 62.9 peratus;
- **Keluaran petroleum bertapis** yang merangkumi 6.9 peratus daripada jumlah eksport, naik 60.4 peratus kepada RM86.2 bilion. Peningkatan ini disebabkan oleh eksport yang tinggi dari negeri Johor iaitu sebanyak RM55.9 bilion. Johor kekal sebagai pengeksport utama keluaran petroleum bertapis dengan sumbangan 64.9 peratus; dan
- **Minyak kelapa sawit** menyumbang 5.2 peratus daripada jumlah eksport meningkat sebanyak 41.6 peratus kepada RM64.6 bilion. Pendahuluan

Tahun 2021 menyaksikan prestasi perdagangan dunia kembali kukuh setelah mengalami kerencatan rantaian bekalan global serta ketidaktentuan ekonomi yang tercetus akibat pandemik COVID-19. Strategi pemulihan ekonomi yang dilaksanakan oleh setiap negara untuk menangani pandemik COVID-19 telah mendorong pemulihan ekonomi global walaupun masih bergelut dengan ancaman pandemik. Faktor utama yang merangsang pemulihan ekonomi global adalah peningkatan pesat kadar vaksinasi. Eksport rakan dagangan utama seperti China (+29.9%), Singapura (+19.1%), Amerika Syarikat (+22.7%), Republik Korea (+25.7%), Taiwan (+29.3%) dan Indonesia (+41.9%) telah mencatatkan pertumbuhan yang memberangsangkan pada 2021 dan memberi manfaat kepada prestasi perdagangan Malaysia.

Kerajaan telah merangka Pelan Pemulihan Negara (PPN) bermula Jun 2021 sebagai strategi peralihan keluar secara berfasa daripada kemelut pandemik COVID-19. Di samping itu, Malaysia telah mencapai sasaran 90 peratus populasi penduduk dewasa lengkap divaksinasi COVID-19 di seluruh negara pada 10 Oktober 2021, seterusnya keputusan larangan perjalanan rentas negeri ditarik balik. Pada masa yang sama, hampir kesemua negeri telah beralih ke fasa 4 PPN, sekali gus menyumbang kepada pembukaan sepenuhnya sektor ekonomi dan mempengaruhi peningkatan permintaan untuk barangan dan perkhidmatan.

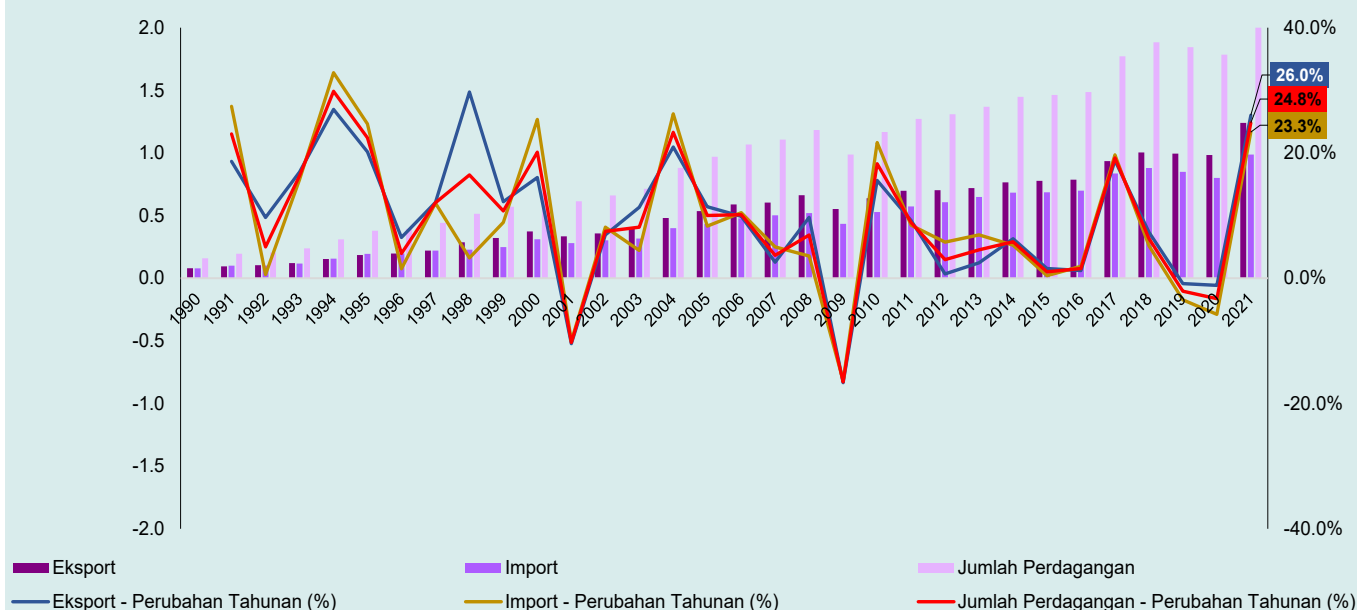

Prestasi Perdagangan Malaysia 2021

Walaupun pandemik COVID-19 masih melanda negara pada tahun 2021, namun negara berjaya menutup tirai 2021 dengan melakar kejayaan apabila jumlah perdagangan Malaysia buat pertama kali dalam sejarah merekodkan pencapaian baharu, melepasi RM2 trilion dan mencatatkan pertumbuhan terpantas sejak 1994 (**Carta 1**).

Nilai perdagangan pulih semula dengan pengembangan dua angka 24.8 peratus kepada RM2.2 trilion berbanding 2020, selepas mencatatkan pertumbuhan negatif selama dua tahun berturut-turut. Eksport meningkat 26.0 peratus kepada RM1.2 trilion manakala import juga meningkat 23.3 peratus kepada RM987.2 bilion. Pertumbuhan ini melepasi unjuran rasmi pertumbuhan eksport dan import masing-masing 17.1 peratus dan 16.5 peratus seperti dilaporkan oleh Tinjauan Ekonomi 2022 oleh Kementerian Kewangan Malaysia pada tahun 2021. Lebihan dagangan Malaysia meningkat 37.7 peratus daripada RM183.3 bilion pada tahun sebelumnya kepada RM252.6 bilion, merupakan lebihan dagangan tertinggi pernah direkodkan. Ini merupakan tahun yang ke-24 lebihan dagangan direkodkan berturut-turut sejak 1998.

Peningkatan dalam eksport 2021, disumbangkan oleh permintaan global yang lebih tinggi terutamanya bagi Barangan elektrik dan elektronik (E&E) (+18.0%), Keluaran petroleum (+60.4%), Perkilangan logam (+67.1%), Minyak sawit dan produk pertanian berasaskan minyak sawit (+48.0%) dan Produk getah (+39.0%) masing-masing mencatatkan pertumbuhan dua digit. Manakala kenaikan import mengikut klasifikasi Penggunaan Akhir adalah disebabkan peningkatan dalam Barangan perantaraan, (+26.9%) yang bernilai RM544.8 bilion. Begitu juga, kategori lain dalam klasifikasi ini turut mencatatkan pertumbuhan positif iaitu Barangan modal (+14.5%) dan Barangan penggunaan (+13.2%). Peningkatan barangan penggunaan menunjukkan keyakinan pengguna terhadap pemulihan ekonomi domestik di sebalik pandemik COVID-19.

Introduction

The year 2021 witnessed strong performance of world trade after experiencing the disruption of the global supply chain as well as economic uncertainty triggered by the COVID-19 pandemic. The economic recovery strategies implemented by each country to deal with the COVID-19 pandemic have driven the global economic recovery despite the fact that the threat of pandemic remains. The main factor stimulating the global economic recovery was the rapid increase in vaccination rates. The exports performance of major trading partners such as China (+29.9%), Singapore (+19.1%), the United States (+22.7%), Republic of Korea (+25.7%), Taiwan (+29.3%) and Indonesia (+41.9%) has recorded impressive growth in 2021 and has benefited Malaysia's trade.

The government had formulated the National Recovery Plan (NRP) in mid-June 2021 as a phased exit strategy from the COVID-19 pandemic crisis. In addition, Malaysia reached the target of 90 per cent COVID-19 fully vaccinated adult population nationwide on 10 October 2021, resulting in the lift of the interstate travel ban. At the same time, almost all states had moved into Phase 4 of the NRP; which means opening of all economic sectors and in turn increased demand for goods and services.

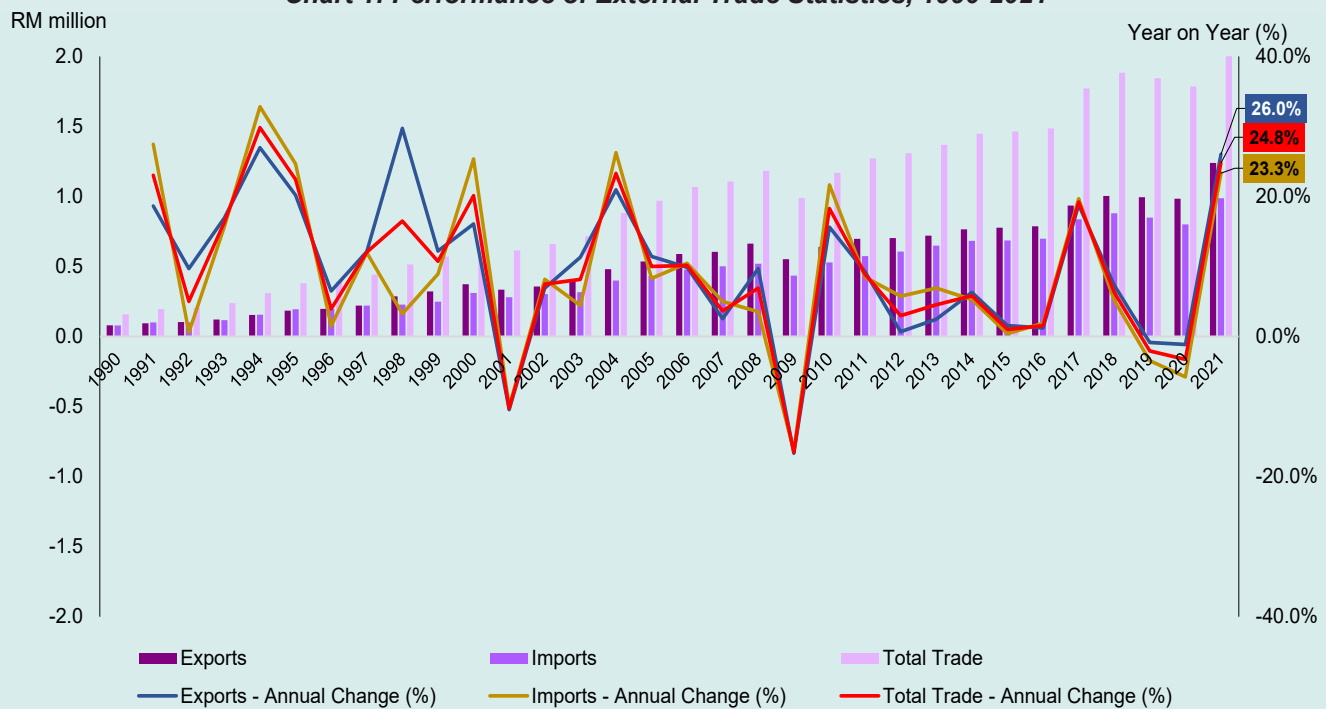

Malaysia's Trade Performance 2021

The COVID-19 pandemic is still plaguing the country in 2021, but the country was able to bring 2021 to a successful conclusion as Malaysia total trade recorded a new milestone, surpassing RM2 trillion for the first time in history and recording the fastest growth since 1994 (**Chart 1**).

Trade value rebounded with a double-digit expansion of 24.8 per cent to RM2.2 trillion as compared to 2020, after recording two consecutive years of negative growth. Exports increased by 26.0 per cent to RM1.2 trillion while imports also grew 23.3 per cent to RM987.2 billion. This growth surpassed the official forecast of export and import growth of 17.1 per cent and 16.5 per cent respectively as reported in the Economic Outlook 2022 by Ministry of Finance in 2021. Malaysia's trade surplus widened by 37.7 per cent from RM183.3 billion in the preceding year to RM252.6 billion, the highest trade surplus ever recorded. This was the 24th consecutive year of trade surplus since 1998.

The increase in exports in 2021 was contributed by higher global demand mainly for electrical and electronics (E&E) products (+18.0%), petroleum products (+60.4%), manufactured of metal (+67.1%), palm oil and palm oil-based agriculture products (+48.0%) and rubber products (+39.0%). Meanwhile, the increase in imports according to the End Use classification was due to intermediate goods, (+26.9%) valued at RM544.8 billion. Likewise, other categories in this classification also recorded positive growth, namely capital goods (+14.5%) and consumption goods (+13.2%). The increment of consumption goods indicates consumer confidence towards the domestic economy recovery amidst of COVID-19 pandemic.

The 2021 trade performance has been encouraging and the high demand for medical goods has also benefitted the overall trade performance. Trade performance in 2022 is expected to remain strong in line with the projections in the Economic and Monetary Review 2021 by Bank Negara Malaysia in March 2022 which projected Malaysia's exports to strengthen 10.9 per cent in 2022 driven mainly by the strong demand from major trading partners for E&E products, while imports to rise 8.1 per cent driven by the increases of three main categories by End Use. As an open economy, Malaysia's recovery is highly dependent on the recovery of the global economy, especially Malaysia's major trading partners.

NOTA TEKNIKAL

1. PENGENALAN

Penerbitan ini mengandungi statistik Perdagangan Luar Negeri Malaysia (barangan) berkaitan import dan eksport di peringkat negeri dengan seluruh dunia. Di samping itu, penerbitan ini menyediakan statistik terperinci bagi setiap negeri mengikut komoditi utama / terpilih dan negara asal dan destinasi. Bahagian pertama penerbitan ini membentangkan ringkasan penemuan. Bahagian kedua penerbitan ini diperincikan kepada lima belas seksyen di mana setiap seksyen membentangkan statistik perdagangan terperinci untuk lima belas negeri di Malaysia.

2. OBJEKTIF

Statistik Perdagangan Malaysia mengikut Negeri pertama kali diterbitkan bagi tahun 2020, bertujuan untuk menyediakan statistik terperinci di peringkat negeri kepada pihak stakeholders. Statistik komprehensif ini dihasilkan dari modul *Trade Enterprise Characteristics* (TEC), iaitu salah satu inisiatif Jabatan di bawah *Statistics Big Data Analytics* (STASBDA) dengan menerapkan penggunaan analisis *Big Data*. TEC mengintegrasikan dua domain statistik yang berbeza iaitu pangkalan data perdagangan barangan antarabangsa dan *Malaysia Statistical Business Register* (MSBR). Inisiatif ini telah memberikan nilai tambah kepada statistik perdagangan antarabangsa yang sedia ada tanpa perlu melaksanakan survei baru.

Melalui TEC statistik perdagangan antarabangsa yang lebih komprehensif mengikut negeri dapat disediakan bagi kemudahan pembuat dasar, penganalisis perdagangan antarabangsa dan penyelidik. Statistik ini amat penting kerana boleh menangani soalan dasar tentang negeri yang terlibat dalam perdagangan antarabangsa dan menguasai eksport Malaysia. Oleh itu, sebarang dasar atau insentif yang relevan dapat dirumus untuk mempromosikan aktiviti eksport.

3. SKOP DAN LIPUTAN

3.1 Aliran Perdagangan Negeri

Eksport diperuntukkan kepada Negeri berdasarkan Negeri asal (iaitu Negeri dalam Malaysia di mana peringkat akhir pengeluaran atau pembuatan berlaku). Sebaliknya, import diperuntukkan kepada Negeri berdasarkan Negeri destinasi terakhir (iaitu negeri di mana barangan dikeluarkan daripada kawalan Kastam, tetapi tidak semestinya di mana barangan itu akhirnya dijual atau digunakan).

Ketepatan dalam pelaporan Negeri asal dan Negeri destinasi akhir dalam dokumentasi oleh pihak Jabatan Kastam Diraja Malaysia memberi kesan kepada kualiti statistik perdagangan barangan mengikut negeri. Dalam hal ini, Negeri pemuatan/pelepasan akan digunakan sebagai proksi bagi negeri asal/destinasi akhir yang sebenar.

3.2 Eksport dan Import di Kawasan Supra dan Wilayah Persekutuan

Aktiviti eksport dan import yang berlaku di kawasan Supra (merangkumi aktiviti pengeluaran yang melangkaui pusat kepentingan ekonomi utama bagi mana-mana negeri) atau periklanan yang dilakukan oleh ejen penghantar tidak termasuk.

Nilai import atau eksport bagi W.P. Kuala Lumpur adalah termasuk W.P. Putrajaya.

4. SUMBER DATA

4.1 Data Perdagangan Barangan Antarabangsa

- a. Pengikraran import dan eksport yang diluluskan oleh Jabatan Kastam Diraja Malaysia (JKDM) dan Pihak Berkuasa Zon Bebas.
- b. Keterangan mengenai pengiriman bungkusan pos/*courier* yang dibekalkan oleh JKDM, Pos Malaysia Berhad dan Keretapi Tanah Melayu Berhad (KTMB).
- c. Penyata dan pengikraran eksport mengenai *bunkers* dan *stores* yang dibekalkan kepada kapal laut dan kapal terbang yang dikeluarkan/diluluskan oleh JKDM, Penerbangan Malaysia Berhad (MAB) dan syarikat-syarikat petroleum.
- d. Penyata penjualan barangan yang dibekalkan oleh pengusaha-pengusaha kedai bebas cukai.
- e. Penyata jualan dan belian elektrik yang dikeluarkan oleh syarikat pengeluar tenaga.

4.2 Malaysia Statistical Business Register (MSBR)

Senarai syarikat perniagaan yang mana ia merupakan satu daftar lengkap perniagaan dan syarikat yang beroperasi di Malaysia. MSBR merangkumi semua senarai pertubuhan yang berdaftar berdasarkan pendaftaran syarikat (ROC), pendaftaran perniagaan (ROB) dan *Limited Liability Partnership* (LLP) yang berdaftar dengan Suruhanjaya Syarikat Malaysia (SSM) serta pertubuhan yang berdaftar dengan Pihak Berkuasa Tempatan dan badan-badan professional.

5. KONSEP DAN DEFINISI

5.1 Konsep dan definisi

Konsep dan definisi yang digunapakai untuk menyusun perangkaan ini berdasarkan *International Merchandise Trade Statistics: Concepts and Definitions* 2010 (IMTS 2010) yang dikeluarkan oleh Pertubuhan Bangsa-Bangsa Bersatu.

5.2 Import

Sesuatu barang dianggap sebagai import apabila ianya dibawa masuk ke dalam negara, sama ada terus ataupun disimpan di gudang-gudang yang dikawal tanpa mengira sama ada barang tersebut adalah untuk kegunaan sendiri, diproses, digunakan dalam perkilangan ataupun untuk dieksport semula ke negara lain.

5.3 Eksport

Sesuatu barang (keluaran atau buatan tempatan atau diimport untuk dieksport semula) dianggap sebagai eksport apabila ianya dibawa keluar dari negara.

6. ASAS PENILAIAN

6.1 Import

Import dinilai mengikut c.i.f. (*cost, insurance and freight* - kos, insuran dan tambang), iaitu nilai barangan di pasaran di sempadan perangkaan/kastam negara pengimport termasuk semua perbelanjaan insuran dan tambang semasa dalam perjalanan tetapi kos pemunggaan dari alat pengangkutan tidak diambil kira kecuali kos tersebut ditanggung sendiri oleh pengangkut.

6.2 Eksport

Eksport dinilai mengikut f.o.b. (*free on board*), iaitu nilai barangan di pasaran di sempadan perangkaan/kastam negara pengeksport termasuk semua perbelanjaan pengangkutan ke sempadan tersebut, duti eksport dan duti lain yang perlu dibayar serta kos untuk memunggah barang ke atas alat pengangkutan kecuali kos terakhir itu ditanggung sendiri oleh pengangkut.

7. KLASIFIKASI BARANG DAGANGAN

Pengelasan eksport dan import adalah mengikut *Standard International Trade Classification (SITC)*, Rev. 4.

8. NEGARA ASAL DAN DESTINASI

8.1 Import

Import dikelaskan mengikut negara asal barangan, iaitu negara di mana barangan itu dibentuk dengan lengkap seperti mana ianya diimport masuk ke dalam negara.

8.2 Eksport

Eksport dikelaskan mengikut negara yang dituju, iaitu negara di mana barangan itu dijangka akan digunakan; berdasarkan sejauh mana maklumat ini dapat ditentukan pada masa ianya dieksport.

9. KEPERLUAN KERAHSIAAN

Data perdagangan telah disusun di bawah peruntukan **Akta Perangkaan 1965 (Disemak-1989)**. Akta ini mensyaratkan bahawa kandungan penyata individu adalah **sulit**. Selaras dengan peruntukan tersebut, hanya angka agregat diterbitkan.

10. PEMBUNDARAN

Jumlah-jumlah kecil, apabila dicampurkan, mungkin tidak bersamaan dengan jumlah besar disebabkan oleh pembundaran.

TECHNICAL NOTES

1. INTRODUCTION

This publication contains statistics of Malaysia's External Trade (merchandise) on imports and exports at the state level with the rest of the world. In addition, this publication provides detailed statistics for each state according to major and selected commodities and country of origin and destination. The first part of this publication highlights the summary of findings. The second part is divided into fifteen sections, whereby each section presents detailed trade statistics for fifteen states in Malaysia.

2. OBJECTIVE

Malaysia External Trade Statistics by State is first initiated in 2020, aiming to provide detailed statistics at the state level to the stakeholders. These comprehensive statistics are generated from the Trade Enterprise Characteristics (TEC) module. TEC is one of the department's initiatives under the Statistics Big Data Analytics (STASBDA) in embracing Big Data Analytics. TEC integrates two different statistics domains: the international merchandise trade database and Malaysia Statistical Business Register (MSBR). This initiative provides value added to an existing international trade statistics without initiating a new survey.

More comprehensive international trade statistics can be provided through TEC to policy makers, international trade analysts, and researchers. These statistics are important as they can address the fundamental questions of which states involved in international trade and dominate Malaysia's exports. Therefore, any relevant policies or incentives can be formulated to promote export activities.

3. SCOPE AND COVERAGE

3.1 State Trade Flow

Exports are allocated to the state based on the state of origin (i.e. state of Malaysia where the final stage of production or manufacturing occurs). On the other hand, imports are earmarked for the state based on the state of final destination (i.e. the state of Malaysia in which goods are released from Customs controls, but not necessarily where they are ultimately sold or consumed).

The accuracy in reporting the actual State of origin and State of final destination on Royal Malaysian Customs Department documentation affects the quality of State merchandise trade statistics. In this case, the state of loading/discharge may be used as a proxy for the actual state of origin/final destination.

3.2 Exports and Imports in the Supra Area and Federal Territories

Export and import activities that are taking place in the Supra area (including production activities beyond the centre of predominant economic interest for any state) or declarations made by the agent are not included.

Imports or exports value for the F.T. Kuala Lumpur includes the F.T. Putrajaya.

4. SOURCE OF DATA

4.1 International merchandise trade data:

- a. *Import and export declarations approved by the Royal Malaysian Customs Department (RMCD) and Free Zone Authorities.*
- b. *Particulars on postal/courier packages are provided by the RMCD, Pos Malaysia Berhad and Keretapi Tanah Melayu Berhad (KTMB).*
- c. *Statements and export declarations on bunkers and stores supplied to ships and aircraft issued/approved by the RMCD, Malaysia Airlines Berhad (MAB) and petroleum companies.*
- d. *Statements on goods sold are supplied by the operators of duty-free shops.*
- e. *Statements on the sale and purchase of electricity issued by 'power producer company'.*

4.2 Malaysia Statistical Business Register (MSBR)

Malaysia Statistical Business Register (MSBR) is a list of establishments or enterprises operating in Malaysia. These establishments or enterprises encompass Register of Companies (ROC), Register of Businesses (ROB) and Limited Liability Partnership (LLP) that registered with Companies Commission Malaysia (CCM) as well as establishment that is registered with the local authority and professional bodies.

5. CONCEPTS AND DEFINITIONS

5.1 Concepts and Definitions

Concepts and definitions used to compile these statistics are based on International Merchandise Trade Statistics: Concepts and Definitions 2010 (IMTS 2010) published by the United Nations, New York.

5.2 Imports

Goods are regarded as imports when they are brought into the country either directly or into bonded warehouses, irrespective of whether such goods are for consumption, to be processed, used in manufacturing or subsequent re-export to other countries.

5.3 Exports

Goods (locally produced or manufactured or imported for subsequent re-exports) are regarded as exports when taken out of the country.

6. BASIS OF VALUATION

6.1 Imports

Imports are valued on a c.i.f. (cost, insurance and freight) basis, that is, the value of the goods in the market at the statistical/customs frontier of the importing country, including all charges for transport and insurance whilst in transit but excluding the cost of unloading from the carrier unless it is borne by the carrier.

6.2 Exports

Exports are valued on a f.o.b. (free on board) basis, that is, the value of the goods in the market at the statistical/customs frontier of the exporting country, including all costs of transporting the goods to the statistical/customs frontier, export and other duties payable as well as the cost of loading the goods onto the carrier unless the latter cost is borne by the carrier.

7. CLASSIFICATION OF COMMODITIES

The classification of exports and imports is according to the Standard International Trade Classification (SITC), Rev. 4.

8. COUNTRY OF ORIGIN AND DESTINATION

8.1 Imports

Imports are classified according to the country of origin of the goods, that is the country where the goods are given the final form in which they are imported into the country.

8.2 Exports

Exports are classified according to the country of destination, that is the country where it is expected that the goods will be consumed insofar as this can be ascertained at the time of export.

9. CONFIDENTIALITY REQUIREMENTS
