

MINISTRY OF ECONOMY
DEPARTMENT OF STATISTICS MALAYSIA

GROSS DOMESTIC PRODUCT FOURTH QUARTER OF 2014

Malaysia's economy expanded **5.8 per cent** in the fourth quarter of 2014. On the supply side, the growth was stimulated by Services, Manufacturing and Mining & Quarrying sectors. For year 2014, GDP rose to **6.0 per cent** with a value added of RM835 billion at constant prices and RM1,070 billion at current prices.

On a **quarter-on-quarter seasonally adjusted**, the GDP in the fourth quarter grew 2.0 per cent.

Table 1: GDP at Constant 2005 Prices

PERCENTAGE CHANGE FROM CORRESPONDING QUARTER OF PRECEDING YEAR								
	2013	2014	Q313	Q413	Q114	Q214	Q314	Q414
GDP	4.7	6.0	5.0	5.1	6.2	6.5	5.6	5.8

PERCENTAGE CHANGE FROM PRECEDING QUARTER

Chart 1: GDP and Annual Percentage Change

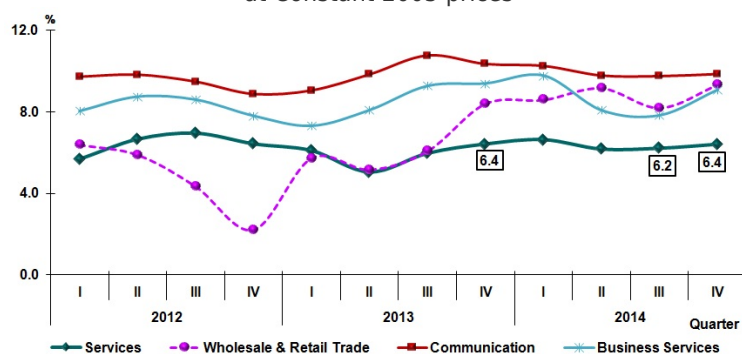

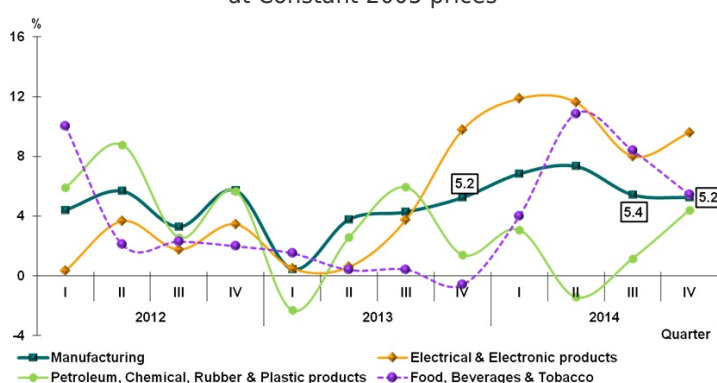

Chart 2: Services and Annual Percentage Change at Constant 2005 prices

Services sector picked-up to 6.4 per cent, following a 6.2 per cent increase in the preceding quarter. The momentum in this sector was largely contributed by the growth in Wholesale & Retail Trade which augmented to 9.3 per cent. Communication remained resilient by posting a growth of 9.8 per cent and Business Services rose to 9.1 per cent.

Chart 3: Manufacturing and Annual Percentage Change at Constant 2005 prices

Manufacturing sector continues to spur the economy growth by registering an expansion of 5.2 per cent during the quarter. The performance was spearheaded by Electrical & Electronic products (9.6%). Petroleum, Chemical, Rubber & Plastic products improved to 4.4 per cent boosted by chemicals and refined petroleum products. Food, Beverages & Tobacco increased to 5.4 per cent following an expansion in food processing and beverages.

Chart 4: Mining & Quarrying and Annual Percentage Change

Mining and Quarrying sector posted a robust growth of 9.6 per cent (Q3 2014: 1.4%). The strong performance was reflected by the double-digit growth in production of crude oil and a turnaround in natural gas to 2.8 per cent.

Chart 5: Private Final Consumption Expenditure and Annual Percentage Change

On the demand side, **Private Final Consumption Expenditure** ascended to 7.8 per cent (Q3 2014: 6.7%) impelled by the higher consumption on food & beverages, communication and transport.

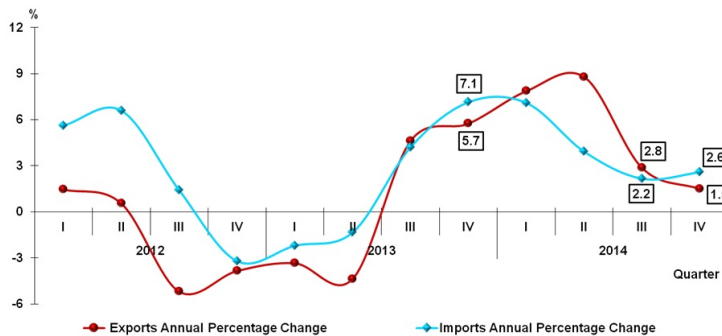

Chart 6: GFCF and Percentage Share at Constant 2005 prices

Gross Fixed Capital Formation (GFCF)

expanded to 4.3 per cent supported by the brisk momentum in Structure at 10.8 per cent. The expansion in GFCF was induced by Private sector (share: 51.4%) which registered a double-digit growth of 11.2 per cent while Public sector slipped to 2.1 per cent in this quarter.

Chart 7: Exports & Imports and Annual Percentage Change at Constant 2005 prices

Exports eased to 1.5 per cent mainly due to the double-digit contraction in exports of services. Meanwhile, exports of goods remained positive by registering a growth of 3.7 per cent for this quarter. **Imports** increased to 2.6 per cent driven by the better demand particularly for goods.
