## LOCAL PRODUCTION

The PPI for local production went down by 0.2 per cent in November 2014 as compared to previous month. The decrease in the overall index was mainly due to the negative changes in two categories (as per classified under MSIC 2000\*) which is Mining (-2.9%) and Electricity, gas & water supply (-0.9%). In contrast, index for Agriculture went up (+1.6%), Manufacturing (+0.2%) and Fishing (+0.1%) [Table 2].

Year-on-year comparison revealed that the PPI for local production moved down by 1.8 per cent in November 2014 over the same month of previous year. The index for Mining decrease 15.5 per cent and Agriculture 4.8 per cent. However, index for Electricity, gas & water supply surged by 6.2 per cent, Fishing

3.2 per cent and Manufacturing 0.8 per cent.

### PPI for Local Production by Stage of Processing

The decrease of 0.2 per cent in PPI for local production by stage of processing (SOP) from previous month was due to the negative change in the index for one stage of processing namely, Crude materials for further processing (-1.5%). However, index for Intermediate materials, supplies and components increased (+0.3%) and Finished goods remained unchanged at 112.8.

As compared with the same month a year ago, the PPI for local production by SOP for November 2014 also decreased by 1.8 per cent. The index for Crude materials for further processing receded 13.9 per cent. In contrast, index for Intermediate materials, supplies and components went up by 1.6 per cent followed by Finished goods 0.6 per cent.
